

New Thomas Locke Thriller Blends Perception with Reality

Bestselling Author Warns,
“What You Don’t Know Can Kill You.”

“A truly remarkable work. The interweaving of three stories is faultless, the tension explosive. The story involving the intelligence community and military is extremely vivid and very well crafted. A wonderful read.”

—Keith Hazard, former deputy director, Central Intelligence Agency

Thomas Locke brings his new book, *Trial Run*, to life with emotionally gripping, pulse pounding, masterful storytelling that will have readers questioning where reality ends and fiction begins. Combining the science of today with possible scientific breakthroughs of the future, Locke delivers a story with a concept so daring and writing so tension filled, that it will leave fans turning the pages and grasping for solid ground.

Reese Clawson is desperate to take control of the groundbreaking research done by Italian psychologist, Professor Gabriella Speciale. The professor has discovered a way to control and direct out-of-body experiences, defying the laws of gravity, locality and time. Clawson is not above spying, stealing or killing to get her hands on this perception-bending technology and selling it to the highest bidder without regard to any possible consequences or human collateral damage. Professor Speciale and her team know that if Clawson isn’t stopped, the past and the future will be at risk.

“I was not prepared for this. It’s somewhere between spectacular and astonishingly compelling. Bunn’s writing has never been stronger. The power of his style is enough to make the book a gripping and intense experience. Ultimately the acid test is that after I finished, I could not let it go. My head is still full of it; and that is a very, very good sign.”—Phyllis Tickle, former senior contributing editor, *Publishers Weekly*
